

Wordpress Hosting

Hoe stel ik SSL in?

1. Login op je webhosting pakket
2. Typ in **SSI/TLS Status**

<input checked="" type="checkbox"/>	Domain	Certificate Status
<input checked="" type="checkbox"/>	 pixelhosting.nl	 AutoSSL Domain Validated Expires on May 10, 2023. The certificate will renew via AutoSSL. View Certificate Upgrade Certificate Exclude from AutoSSL
<input checked="" type="checkbox"/>	 autodiscover.pixelhosting.nl	 AutoSSL Domain Validated Expires on May 10, 2023. The certificate will renew via AutoSSL. View Certificate Upgrade Certificate Exclude from AutoSSL
<input checked="" type="checkbox"/>	 cpanel.pixelhosting.nl	 AutoSSL Domain Validated Expires on May 10, 2023. The certificate will renew via AutoSSL. View Certificate Upgrade Certificate Exclude from AutoSSL
<input checked="" type="checkbox"/>	 cpcalendars.pixelhosting.nl	 AutoSSL Domain Validated Expires on May 10, 2023. The certificate will renew via AutoSSL. View Certificate Upgrade Certificate Exclude from AutoSSL
<input checked="" type="checkbox"/>	 cpcontacts.pixelhosting.nl	 AutoSSL Domain Validated Expires on May 10, 2023. The certificate will renew via AutoSSL. View Certificate Upgrade Certificate Exclude from AutoSSL

4. Druk nu op **Run AutoSSL**
5. Binnen enkele minuten zou SSL nu actief moeten zijn

1. Om altijd een beveiligde verbinding te gebruiken, Ga naar **Domains**

2. En schakel **Force HTTPS Redirect** naar **On**:
