

Shared Webhosting

Hoe stel ik SSL in?

1. Login op je webhosting pakket
2. Typ in **SSI/TLS Status**

Include Domains during AutoSSL		Exclude 38 Domains from AutoSSL	Run AutoSSL
Domain	Certificate Status		
<input checked="" type="checkbox"/>  pixelhosting.nl	AutoSSL Domain Validated Expires on May 10, 2023. The certificate will renew via AutoSSL. View Certificate Upgrade Certificate Exclude from AutoSSL		
<input checked="" type="checkbox"/>  autodiscover.pixelhosting.nl	AutoSSL Domain Validated Expires on May 10, 2023. The certificate will renew via AutoSSL. View Certificate Upgrade Certificate Exclude from AutoSSL		
<input checked="" type="checkbox"/>  cpanel.pixelhosting.nl	AutoSSL Domain Validated Expires on May 10, 2023. The certificate will renew via AutoSSL. View Certificate Upgrade Certificate Exclude from AutoSSL		
<input checked="" type="checkbox"/>  cpcalendars.pixelhosting.nl	AutoSSL Domain Validated Expires on May 10, 2023. The certificate will renew via AutoSSL. View Certificate Upgrade Certificate Exclude from AutoSSL		
<input checked="" type="checkbox"/>  cpcontacts.pixelhosting.nl	AutoSSL Domain Validated Expires on May 10, 2023. The certificate will renew via AutoSSL. View Certificate Upgrade Certificate Exclude from AutoSSL		

4. Druk nu op **Run AutoSSL**
5. Binnen enkele minuten zou SSL nu actief moeten zijn

1. Om altijd een beveiligde verbinding te gebruiken, Ga naar **Domains**

2. En schakel **Force HTTPS Redirect** naar **On**:
